VISHAL DWIVEDY

QA Automation Engineer
+91-7004212369 | Vishaldwidy@gmail.com | linkedin.com/in/vishal-dwivedy | github.com/VishalXDev

PROFESSIONAL SUMMARY

QA Automation Engineer with 1.5 years of experience in end-to-end test automation, CI/CD and AI/LLM quality for production React.js applications. Wrote 500+ automated tests from scratch in Playwright and Selenium WebDriver, drive shift-left testing through GitHub Actions pipelines, and independently closed 400+ Jira defects, the majority critical. Full-stack background (React, Node.js, REST, SQL) enables fast root cause analysis and close collaboration with engineering.

TECHNICAL SKILLS

Test Automation: Playwright (TypeScript, JavaScript), Selenium WebDriver, Page Object Model, End-to-End (E2E) Testing, Regression Automation, Cross-Browser Testing
API and Data: REST API Testing, Postman, SQL, Data Validation, MongoDB, Firebase
CI/CD and Performance: GitHub Actions, CI/CD Pipelines, Shift-Left Testing, Load and Performance Testing (JMeter, k6)
AI/LLM Quality: LLM Output Validation, Prompt Testing, Streaming Response Validation, AI Chatbot QA
QA Practices: Test Planning, Test Case Design, Exploratory and Functional Testing, Defect Triage, Root Cause Analysis, Accessibility (WCAG), Agile/Scrum, Jira
Development: React.js, Next.js, Node.js, Express.js, GraphQL, WebSockets

PROFESSIONAL EXPERIENCE

Software Engineer (SDE I), QA and Automation, 169Pi (Buddhimatrix Pvt Ltd) **Aug 2025 - Present**

- Own end-to-end quality for production React.js and LLM-powered products, from test planning through pre-release verification, across manual and automated workflows.
- Authored 500+ automated test cases from scratch in Playwright (TypeScript, JavaScript) and Selenium WebDriver on a Page Object Model framework, covering cross-browser E2E and regression flows.
- Independently identified, triaged and closed 400+ defects in Jira, the majority critical, spanning performance, security, functional and UI/UX issues; partnered with engineers on root cause analysis.
- Built a GitHub Actions CI/CD pipeline from scratch that runs the automated suite on every push, moving defect detection earlier into PR review.
- Developed LLM evaluation test cases for prompt handling, streaming responses and output accuracy, reducing prompt and streaming regressions.
- Authored Postman REST API test suites and SQL validation queries to verify backend data integrity.
- Ran load tests (JMeter, k6) and WCAG accessibility audits, and analyzed dashboard metrics to surface gaps in user workflows.

Software Developer Intern, Bitsphere Infotech Pvt Ltd **Sep 2024 - Feb 2025**

- Built responsive React.js and Tailwind CSS components with optimized rendering, increasing user session interaction by about 25%.
- Integrated and tested REST APIs across core features, fixing edge-case defects to improve data handling reliability.
- Contributed to sprint planning, agile ceremonies and peer code reviews.

PROJECTS

ISROgyan / ISRO Space Agent (ISRO URSC, GYAAN Initiative) | Python, RAG, LLM Agents

- Contributed to an AI agent that structures large volumes of technical PDFs into searchable knowledge bases, and independently owned end-to-end platform QA.

169Pi AI Playground | React.js, Node.js, REST APIs

- Built the UI, API integration and SDK integration for a production playground used to test LLMs in real time.

169Pi API Platform | React.js, Node.js, Express, MongoDB

- Built the production developer platform: payment gateway integration, API key generation and user dashboard.

EDUCATION AND CERTIFICATIONS

B.Tech, Computer Science, Chandigarh University **2026**

B.A., Psychology, S.S.J.S.N College **2022**

Certifications: IBM Full-Stack Development (Coursera); Data Science with R (Chandigarh University)
